

NEW SUREFLO™ AUTOMATIC TOUCH-FREE SOAP DISPENSERS

Bobrick's new Sureflo automatic counter-mounted soap dispensers lower operating costs, reduce waste, simplify maintenance and improve patron satisfaction.

Advanced fiber-optic technology ensures these soap dispensers activate when you want and not when you don't.

Non-proprietary design accepts most brands of liquid or foam soap, eliminating costly cartridge systems and contracts.

Refilling from bulk soap containers instead of single-use cartridges saves money and helps preserve the environment. Saves up to 80% compared to contracts for proprietary soap cartridges.

Unique top-fill mechanism is fast and convenient, completely eliminating the need for awkward under-counter refills and replacements.

For more information, contact international@bobrick.com or visit www.bobrick.co.uk.

Economical bulk soap pays back dispenser cost in one year average.

Oversized 50mm wide top-fill port makes filling easy.

Less post-consumer waste generated.

BUILDING VALUE SINCE 1906
