

DUALFLOW PLUS

Safe **BIOCOTE**[®] antimicrobial protection agent

mediclinics

Dualflow Plus uses the **BIOCOTE**[®] antimicrobial technology.

The inclusion of **BIOCOTE**[®], a silver based antimicrobial agent that is embedded into the key parts of the drying system, inhibits the growth of odour causing and staining microbes. It makes the **DUALFLOW PLUS** one of the most stain and odour resistant hand dryers in the market.

BIOCOTE[®] antimicrobial protection technology is built in all parts of the drying chamber and also in the water tank during manufacturing.

BIOCOTE[®] antimicrobial protection, as an integrated part of our product development is intended as a hygienic additional to normal cleaning practices, not a substitute.

The level of microbes on a BioCote[®] protected surface is reduced up to 99.5% in two hours, compared to an untreated one.

BioCote[®] technology starts to have an effect after just 15 minutes.
